

Job Description

Plumbing & Heating engineers (sub-contract)

We are now recruiting engineers across Southern England and Home Counties to join our successful team of quality installers; we have long term projects with good consistent potential earnings.

Purpose

The role is to carry out installations of plumbing and mechanical services including water, gas and soil systems in new build housing and light commercial developments.

We offer

- Good commercial priced rates
- Additional variation payments
- Management payments
- Material management payments
- Vehicle provision (details on request)
- Fuel provision

Requirements and Skills

- NVQ or City & Guilds in plumbing and heating
- Gas safe registered. (training and support available)
- CSCS card (assistance provided)
- Unvented Hot water G3 (assistance provided)
- New build sites experience with some administration of the drawings and build programs
- Good communication skills
- Driving Licence
