

Role Description: New Build Electricians

Company Background

HBS Group Southern is a leading mechanical, electrical and renewable energy specialist, providing design, installation and maintenance services across all business sectors in the UK. For over 65 years, our key focus has been supporting house building. This makes us extremely familiar with the demands and needs of the UK's leading developers and their build programmes.

Our success in consistently delivering excellent standards of workmanship and service in a safe and considerate working environment is built on our commitment to core values that remain unchanged since the company was first established by founder Harry Bull in 1950.

Opportunity

Due to continued growth, HBS Electrical are looking to expand their workforce and recruit fully qualified electricians with new build experience to work on large housing developments that have been secured across the South and home counties.

You will be required to carry out 1st and 2nd fix installations of electrical services including electrical circuits, lighting and ventilation in new build housing and light commercial developments.

We offer

- Long term guaranteed work with potential earnings of £55k+ (sub contract)
- Competitive price work rates
- Fortnightly payments
- Commercial price work rates
- Management payments
- Material management payments
- Uniform provided including PPE
- Support from our team of office-based specialists and dedicated contracts managers
- Fuel provision

Requirements and skills

- NVQ 3 or City & Guilds equivalent in electrical installation
- 17th Edition
- Minimum two years new build experience covering 1st and 2nd fix in new homes
- Ability to understand drawings and build programs
- ESCS card
- Ordering of materials as required from our in-house buying department
- Good communication, IT and organisation skills essential
- Full driving licence
- Testing & Inspection experience desirable
